

Averis X Monash Hackathon 2026 FAQ

Event Overview & Timeline

1. What is the event timeline and key dates for Averis Hackathon 2026?

- **Registrations Open:** 1st September 2026.
- **Opening Ceremony (Virtual):** 18th September 2026. (18:00 p.m.)
- **Workshops 1 & 2 (Virtual):** 20th September & 21st September 2026.
- **Preliminary Round Submission Deadline:** 22nd September 2026 (12:00 p.m.).
- **Finalist Shortlisting:** 23rd September 2026 (12:00 p.m.).
- **Finalists Announcement:** 24rd September 2026.
- **Final Pitch Day (Physical):** 26th September 2026.

2. Who are the co-organizers of the Averis Hackathon 2026? The event is jointly organized by Monash University Malaysia Tech Club (MUMTEC) and Google Developer Group on Campus Monash University Malaysia (GDGoC MUM) in collaboration with Averis.

General Information & Eligibility

1. Is there a registration fee? No, registration to participate in Averis Hackathon 2026 is completely free of charge (FOC).

2. Who can participate?

- Actively enrolled undergraduate and postgraduate students from any university and recent graduates not currently working are eligible, provided at least 1 team member comes from an IT-related academic background (including double-degree students where at least one degree is IT/Computer Science-related).
- Judges, Mentors, Sponsors, and Organisers are **not** eligible.

3. What are the team rules?

- Participation must be in teams of 2 to 5 members.
- Cross-institutional teams are permitted.
- Switching members is strictly prohibited without organizer approval.
- No team changes are allowed once the registration deadline passes.

4. Where will the competition be hosted?

Communication and competition events take place virtually on Discord. However, the Final Pitch Day on 26th September will take place physically at the Monash University Malaysia campus.

Registration and Account

1. How can we check if we've successfully registered?

If you've already registered, you should be able to sign in to the website (<https://averisxmonashhackathon2026.my>). However, due to university restrictions, the website currently does not accept university email addresses for sign-in.

If you previously registered using a university email, you will receive an email from us asking you to provide your personal email address. You can then use your personal email to sign in.

Team Requirements & Attendance

1. Is it mandatory to attend the Opening Ceremony?

Yes. All registered participants must attend the virtual Opening Ceremony.

2. Is it okay if 1–2 members can't make it to the Final Pitch Day or Opening Ceremony?

Unfortunately, all registered team members are required to be present at both the Opening Ceremony and, if their team is selected as a finalist, the Final Pitch Day.

3. Can non-finalists attend the Final Pitch Day?

Unfortunately, only finalists are allowed to attend the Final Pitch Day on 26th September. For finalist teams, all registered team members must be present.

Technical & Project Requirements

1. What is the aim of the hackathon?

Participants are challenged to leverage tools, such as AI, cloud computing, real-time data analytics, blockchain, IoT, or mobile applications, to create scalable and efficient solutions for the supplied problem statement.

2. What technology stack must be included?

You are free to use any technology stack or tools of your choice. There are no restrictions. However, teams are strongly encouraged to adopt a well-designed software architecture that supports the functionality and overall objectives of their project.

3. What are the requirements for AI and Cloud tool usage?

Teams are free to use any AI tools or models. However, all projects must meet the following criteria:

- **AI Integration:** Submissions must meaningfully incorporate AI as part of the core functionality, development, or deployment.
- **Cloud Infrastructure:** Solutions must utilize cloud infrastructure. Failure to meaningfully integrate cloud technology may result in significantly reduced scores during evaluation.

4. What stage of development is required for each round?

- **Preliminary Round:** At minimum, a low-code solution with a semi-working prototype is strongly encouraged. Pure no-code submissions are not accepted.
- **Final Round:** A fully functional working prototype extending your preliminary entry is expected.

Submissions & Final Pitch Day

1. How do teams submit their preliminary entries? Submissions are made via Google Forms prior to 22nd September 2026 (12:00 p.m.) and must include:

- **Team Details:** Member details and resumes.
- **Project Details:** Project name, description, setup, and repository link (GitHub/GitLab) with a clear [README.md](#).
- **5-Minute Pitching Video:** YouTube link (Public or Unlisted only; Private videos will not be evaluated). Exceeding 5 minutes incurs a **1-mark deduction for every 30 seconds of delay**.
- **Written Responses:** Details on problem-solution alignment, AI and cloud infrastructure integration, user feedback/testing, coding challenges, success metrics, and scalability plans.

2. What happens if our team is selected as a Top 10 Finalist?

- The Top 10 finalist teams will present live on **Final Pitch Day (26th September 2026)**.
- Each team receives **15 minutes total**: 10 minutes for project pitch & demonstration, followed by 5 minutes for Q&A with judges.
- The Award Ceremony will take place right after all teams have finished their pitch.

Evaluation Criteria

1. How is the Preliminary Round scored (100-Point Scale)?

- **Technical (70% / 70 Pts):**
 - System Design and Architecture (15 pts)
 - Working Core Prototype (25 pts)
 - Technology Integration (15 pts)
 - Technical Feasibility & Validation (15 pts)
- **Product & Impact (30% / 30 Pts):**
 - Problem Statement Understanding (10 pts)
 - Innovation & Solution Approach (10 pts)
 - Practical Value & Potentia (10 pts)

2. How is the Final Round scored (100-Point Scale)?

- **Technical (70% / 70 Pts):**
 - End-to-End Functionality (25 pts)
 - Architecture & Scalability (15 pts)
 - Technology Integration (15 pts)
 - Engineering Quality & Robustness (15 pts)
- **Product & Impact (30% / 30 Pts):**
 - Solution Effectiveness & User Value (10 pts)
 - User Experience & Differentiation (10 pts)
 - Impact & Future Potential (10 pts)

IP, Data Privacy & Rules

1. Who owns the Intellectual Property (IP)? Participants retain full IP rights to their projects. Participants grant organizers a non-exclusive, royalty-free license to showcase and promote projects for marketing and educational purposes.

2. How is submitted resume data used? By entering, participants consent to sharing their submitted resumes with event sponsors and partners for recruitment, networking, internship, and job opportunities.

Still Have Questions?

What if my question isn't answered in this FAQ?

If you have any further questions, need technical assistance, or want to connect with other participants, join our official Discord server!

- **Where to Ask:** Head over to the dedicated [#faq](#) or [#create-a-ticket](#) channels on our Discord server.
- **Support Available:** Our organizing team and mentors are active on Discord to help clarify competition rules, submission requirements, and technical guidelines.
- **Community:** Use the Discord channels to network, share ideas, and find teammates if you are looking to build a team.
